

HOMEWORK 16

For each section (within each chapter) we covered list at least one important point or topic. Elaborate as necessary. For Fitzpatrick there should be at least two and more likely three, four or more important points, topics or theorems.

Your final exam is cumulative, but will focus more on the Fitzpatrick material. You should expect it to be 1.5 to 2 times the length of a regular exam. It is at 8AM May 18th in our class room.

This homework will be collected and graded for completeness - not accuracy. It will be available for you to pick up from me no later than Friday May 11th - I will be in that day from about 9 : 30 to 2 : 45.
