

MATH 630, Fall 2011, HW 2

1) Prove that Lebesgue measure is finitely additive on the  $\sigma$ -algebra of Lebesgue measurable sets in  $\mathbb{R}$ .

2) Let  $E \subset \mathbb{R}$  satisfy  $m^*(E) < \infty$ . Construct open interval coverings  $\{U_n\}$  and  $\{V_n\}$  of  $E_1 = E \cap (a, \infty)$  and  $E_2 = E \cap (-\infty, a]$ , respectively, such that

$$\sum_{n=1}^{\infty} (m(U_n) + m(V_n)) \leq m^*(E) + \epsilon.$$

3) Choose one of the following: Problem 2.3.a, Problem 2.3.b.

4) Choose one of the following: Problem 2.3.c, Problem 2.3.d, Problem 2.4.

5) Choose one of the following: Problem 2.2, Problem 2.8, Problem 2.13.
