

13th International Conference on Hyperbolic Problems: Theory, Numerics, Applications (HYP2010)

The thirteenth International Conference on "Hyperbolic Problems: Theory, Numerics and Applications" (HYP2010) will be held at the Xijiao Hotel, Beijing on June 15-19, 2010. The objective of this conference is to bring together researchers, practitioners and students with interest in theoretical analysis, numerical simulations, and applications of hyperbolic PDEs and related mathematical models appearing in the area of applied sciences. The conference will keep the traditional balance of the HYP series, blending theory, numerics and applications. In addition, additional new attracting points are also taken into granted.
