

CONTENTS

<i>Preface</i>	v
<i>Acknowledgment</i>	vii
Gravity Induced Dispersion For Nearly Flat Vortex Sheets <i>Daniel Sporn and J. Douglas Wright</i>	1
An Experimental Study of Low-Frequency Waves Generated by Random Gravity Waves in Shoaling Water <i>X. Liu, Y. Yang and P. Huang</i>	7
Statistical Theories and Direct Numerical Simulations <i>Nathaniel Whitaker</i>	29
Wave Modulated Turbulent Fields at the Ocean Surface and Related Air-Sea Fluxes <i>F. Veron and W. K. Melville and L. Lenain</i>	49
Approximate Periodic Solutions for the Rapidly Rotating Shallow-Water and Related Equations <i>Bin Cheng and Eitan Tadmor</i>	69
Practical Wind Wave Modeling <i>H. L. Tolman</i>	79
Nonexistence Of Continuous Solutions for a Semilinear Wave Equations with Smooth Data <i>Alfonso Castro</i>	93

Exact Theory Of Existence and Stability for Two- and Three-Dimensional Solitary Waves	101
<i>Shu-Ming Sun</i>	
Tsunami Propagation, Directivity, and Pulse Persistence from a Finite Source	120
<i>George F. Carrier and Harry Yeh</i>	
Computing the Lagrangian Coherent Structures of a Kinematic Meandering Jet	140
<i>Amal A. El Moghraby</i>	
Mathematical Methods for Coupled Nonlinear PDE's	159
<i>Sean Brooks and M. F. Mahmood</i>	
Oblique Interaction of Solitary Waves	169
<i>Min Chen</i>	
A Simple Proof of a Priori Estimates for Water Waves	181
<i>Daniel Coutand and Steve Shkoller</i>	
Demonstration Experiments in the NSF-CBMS Regional Conference on Water Waves	191
<i>D. Henderson, R. Geist, K. Hammack and H. Segur</i>
